■ WY 2020 ■ Current WY

Delta outflow conditions continue to be balanced with salinity management controlling operations. DWR is installing a flow barrier at False River, which will allow slightly lower outflows that save upstream reservoir storage. Delta inflows remain low, with inflows just what is needed for outflow and in-Delta use. Upstream storage at Shasta, Folsom and Oroville is falling. Reservoir releases remain low.

Note: Yesterday's X-2 Position is estimated.
