Storm season looks like it's over. Nothing significant last week and nothing projected next week. The snowpack is essentially gone and streamflow is declining.

*Note: Percentages in each plot refers to percent of average for this date. When historic data is unavailable, Snow Water Content Bar plot is not shown. The percent of historic average for each SWC location differs slightly from CDEC's report due to small discrepancies in historical data.

Project Operations

5/28/2021

Delta outflow conditions continue to be balanced with X2 salinity management controlling operations. Delta inflows remain low, with inflows just what is needed for outflow and in-Delta use. Upstream storage at Shasta, Folsom and Oroville is falling. Reservoir releases remain low.

Note: Yesterday's X-2 Position is estimated.

Daily Average Flow
