Project Operations

12/3/2021

Delta outflow conditions continue to be balanced with salinity management controlling operations. Delta inflows decreased and considerable reduction in SWP exports from last week. Minor increase in storage at Shasta and Oroville, but it is still running below average and other historic dry year levels for this time of year. The storage at Folsom is higher than the historic dry year level.

Note: Yesterday's X-2 Position is estimated. OMR flow is as reported on 11/29.

Daily Average Flow

As reported on 12/2
