

Sample Social Media Posts

Supporting agencies of the Voluntary Agreements are urged to use social media to help educate key audiences about how the Voluntary Agreements represent an unprecedented opportunity to improve the Bay-Delta ecosystem for the benefit of all Californians.

The below posts may be customized to fit your agencies' messaging and used in combination with photos that illustrate your local environment. We encourage you to use the hashtag #VoluntaryAgreements in all social posts.

- The [#VoluntaryAgreements](#) are a watershed-wide approach to flows, ecosystem restoration & water supply reliability to balance beneficial uses of [#CAWater](#).
- Today's [#VoluntaryAgreements](#) represent a comprehensive, 8-year solution for science-based water management in the [#BayDelta](#) & its tributaries, restoring habitats while preserving adequate supplies for 35 million Californians. [#CAWater](#)
- CA's economy & environment needs a holistic, functional flow water management strategy that applies the best [#science](#) to meet real-time ecosystem needs while providing adequate [#CAWater](#) supplies for communities. The [#VoluntaryAgreements](#) are the solution.
- Through the [#VoluntaryAgreements](#), significant, coordinated investments will be made to improve fish & wildlife habitat conditions throughout the [#BayDelta](#) watershed including more than 40,000 acres of habitat restoration. [#CAWater](#)
- [#CAWater](#) agencies, the federal govt & state govt are committed to setting [#California](#) on a path forward toward water resilience through the [#VoluntaryAgreements](#) & have already committed over \$1 billion in funding for habitat restoration projects, a science program & more.
- The [#VoluntaryAgreements](#) include up to 825,000 acre-feet/year of new environmental water that can be adaptively managed to restore native fish populations & habitats in the [#BayDelta](#). This is the biggest purchase of water for the environment in CA's history. [#CAWater](#)
- [#VoluntaryAgreements](#) = the best path forward. With ongoing drought & climate extremes [#California](#) can't afford to take a decades-long regulatory approach. Time isn't on our side when it comes to securing a [#CAWater](#) future for communities & the environment.
- The time for a watershed-wide approach to managing California's natural resources in the [#BayDelta](#) & beyond is now. With unprecedented commitments & momentum, the solution is the [#VoluntaryAgreements](#). [#CAWater](#)
