Delta outflow conditions remain 'balanced'. Delta inflows and outflows were relatively steady last week, and CVP and SWP exports remain similar to last week's amounts. Shasta and Oroville Reservoir storage amounts are still significantly below average levels for this time of year, but are higher than dry conditions experienced in 1977. The storage at Folsom increased from last week, and are above the historic average level.

Note: Yesterday's X-2 Position is estimated.
