Project Operations

7/15/2022

Delta outflow conditions remain 'balanced'. Delta inflows this week were similar to last week, with a slight decrease in Delta outflows. CVP export increased as compared to last week's amounts. Shasta and Oroville Reservoir storage amounts are still significantly below average levels for this time of year, but are higher than dry conditions experienced in 1977. The storage at Folsom is above the historic average level but releases remained high this week to improve Delta inflows. All storage volumes decreased from last week. Note: Yesterday's X-2 Position is estimated.
