Delta outflow conditions remain 'balanced'. Delta outflows have increased as compared to last week, with a decrease in SAC and SJR inflow. CVP exports reduced and SWP exports remain the same as last week's amounts. Shasta and Oroville Reservoir storage amounts are significantly below average levels for this time of year. The storage at Folsom is also below the historic average level. All storage volumes decreased from last week. Note: Yesterday's X-2 Position is estimated.

## Daily Average Flow

As reported on 10/6
