No significant precipitation forecast for California through next week. Cumulative precipitation for the Sierras are similar to average value for this time of year. The snow water content is above the average values for this time of year. Actual runoff is similar to the historical average rates, close to conditions experienced in 2020.

*Note: Percentages in each plot refers to percent of average for this date. When historic data is unavailable, Snow Water Content Bar plot is not shown. The percent of historic average for each SWC location differs slightly from CDEC's report due to small discrepancies in historical data.
